

HANOI VIETNAM

REFERENCE: Hanoi Urban Transport Development Project (HUTDP)

CLIENT: Hanoi People's Committee
In association with Consia
Financed by the World Bank

YEAR: 2012 – 2015 (planned)

PROJECT DESCRIPTION

The present sub-project “Institutional strengthening of TRAMOC and creation of PTA” aims at securing the coordination and integration of Hanoi’s public transport system. Main components of the three-year institutional and technical assistance program are (i) the implementation of a Bus Rapid Transit system (BRT) and (ii) the establishment of a Public Transport Authority (PTA).

BRT

The project provides a comprehensive package of technical assistance and training for the implementation and operation of the first BRT line in Hanoi. This includes preparation of operational and maintenance manuals as well as fare policy and institutional aspects. Infrastructure design and bus specifications are reviewed and modified. Training is provided to the regulatory agency and to the operator

PTA

A review is made of the present legal and institutional structure as well as of international experience. Based on this, a reform program is designed for the setting up of a Public Transport Authority with responsibility for all modes.

A full training program is prepared for the short term as well as for the long term, including study tours to different countries..
